Elevator Protection

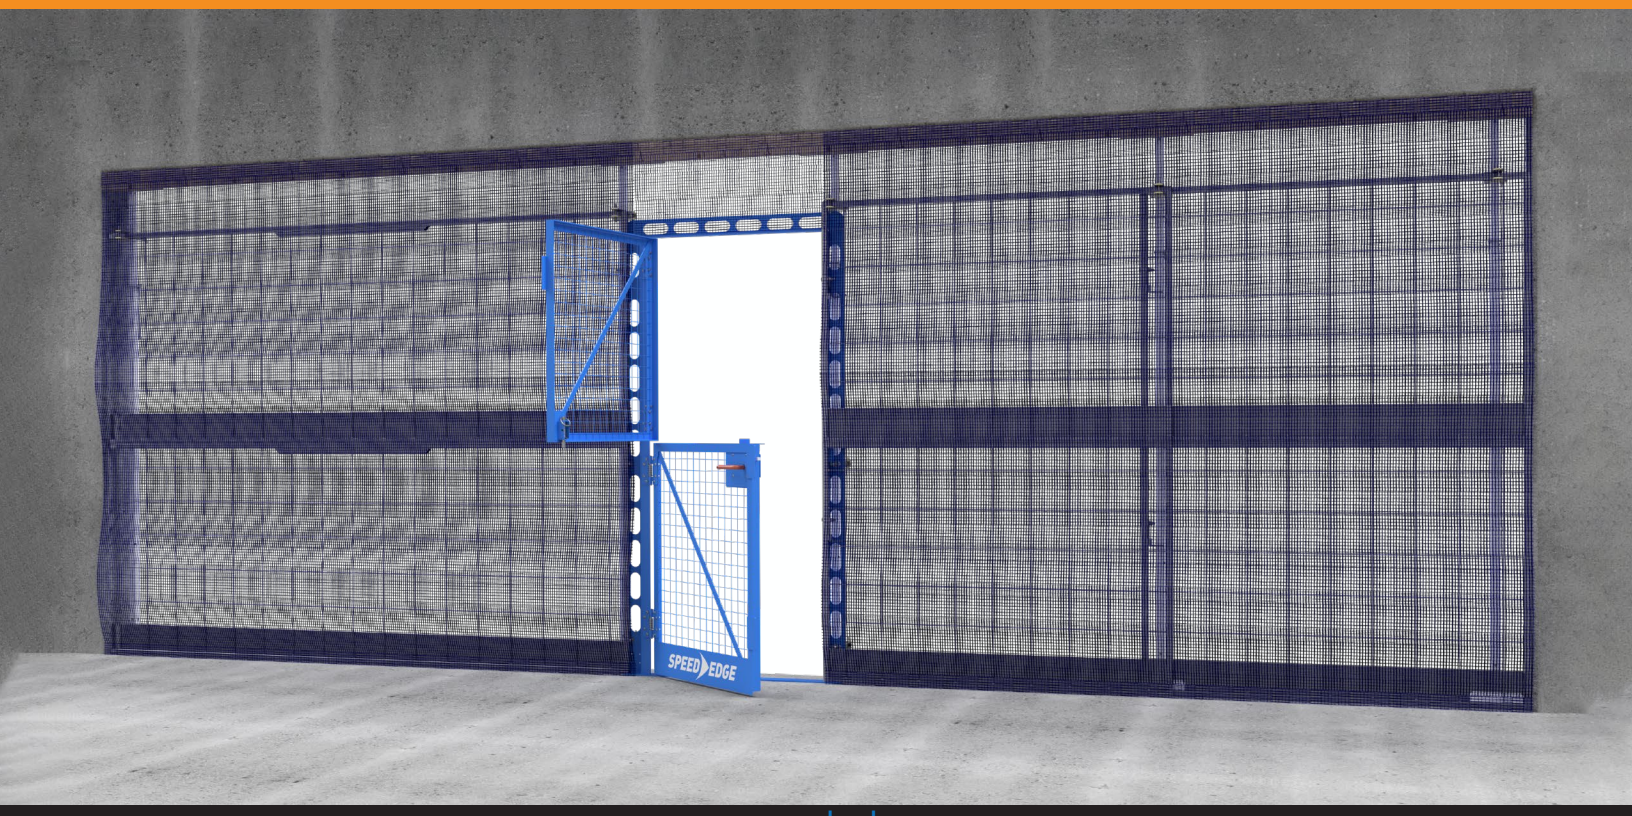

The fastest and most flexible elevator shaft protection solution on the market.

The Elevator Protection System has been designed for quick and easy installation with next to no pre-coordination or setup.

The Elevator Protection System works seamlessly with the Speed Edge System components to give you a flexible, modular solution to protect any size elevator shaft opening to the specific requirements of your site. It is adaptable to provide an operable door, with fast egress and lockable handle as well as options to cover the opening with debris mesh, tarps or full sheeting.
